ABOUT US

Pigments India Ltd. established in 1982, is the market leader in manufacturing and distribution of wide variety of synthetic iron oxide which ensures both quality and consistency. Abundant with technical expertise and prominent production facilities, we are distinguished by our exorbitant grade compliant approach and environmentally harmonious processing. Pigments India Ltd. as a responsible entity is committed to adhere strictly with all health and safety policies and is dedicated to develop products that would give complete customer fulfillment.

PRODUCT SPECIALTIES

Our assemblage of synthetic iron oxide is identified in the pigment industry by its exceptional weather stability, durability, less toxicity and chemical resistance ability.

It is available in different colour shades in accordance with specific requirements and is non aggressive. The exactness in light fastness - the resistance of colours towards fading or darkening because of light and several other factors - is optimal in our synthetic iron oxides which make it more demanding.

OUR CORE VALUES :::::

Values uphelded by PIL is focused on consistently improving and improvising on our products, services and process to exceed the customers satisfaction. In order to achieve the same, we give utmost importance to:

- **Environment**
- **Health**
- **Customer Satisfaction**
- **Team Work**

made in India

India is a country which has been in the forefront of developing nations and is a fast paced growing economy. Moreover a country having great tradition in upholding values, creating diverse solutions and creating solutions for the humanity.

An Indian product should always be one with the highest quality ensuring customer satisfaction as the major value.

We are also proud to say that we are responsible citizens and is striving to contribute to this great nation in all possible manner.

focused on small business

Small business are the backbone of any country and PIL is one such organization in India consistently contributing to the development of the nation. Moreover, it is also necessary to display our competency in the SME sector ensuring highest quality and customer satisfaction. PIL focuses on building a sustainable business model ensuring where in the local population benefit out of it and we stay as a responsible and committed business.

responsible chemistry

Environment is to be preserved for the future and every single human being is to stand committed for this very use. PIL ensures that the process and products utilized are environment friendly and with minimal emissions. We stand in the forefront to preserve and sustain good health, great happiness and green earth.

Synthetic Iron Oxide

Synthetic iron oxide pigments are excellent means of architectural manifestation. It offers a great combination of cost effectiveness, UV radiation resistance, stability, and cement compatibility.

Concrete paving tiles which incorporate synthetic iron oxide provides a perfect natural look as well as light fastness. A complete collection of colours are enthusiastically available out of synthetic iron oxide. Fine particle size of synthetic iron oxide helps in increased efficiency and the great tinctorial strength enhances its ability to impart colour evenly and deeply.

BLACK

Synthetic Black from Pigments India Ltd. is a well synthesized iron oxide pigment which has been developed through most modern technology and hence has an excellent dispersion capacity which makes the entire process easy for paving tile manufacturers. High tinting strength and colour consistency of our synthetic black pigments especially with flooring black and jet black makes it most favorite in the paving tiles industry. Our synthetic Black pigment is of excellent quality and has become synonymous with an elevated degree of permanence as the colour exists for a very long time without any fading.

DARK BROWN

Perfectly withstanding the outdoor conditions, synthetic Dark Brown pigments gives a perfect look for the terrain where ever it is paved. It provides absolute colour purity and good dispersibility without any formations of aggregates and is a choice of many.

We have premium quality synthetic iron oxide in Bright Red variant also. It has accurate composition and prolonged shelf life. It is processed under the supervision of experts, thus it stands unique in its colour proportion and enhances its colour strength. It is made in a manner to apply easily and to give a positive & warm tone to the surfaces by adapting flexibly to the environment.

**BRIGHT
RED**

Successfully withstanding all the tests of time, synthetic iron oxide Red comprises of scarlet red colour with a little hue of rust colour mixed with it and comes with maximum purity. The richness and brightness of this pigments enhances classic look with less intensity and provides an artistically pleasing surface with compound shades and variations. Paved tiles incorporated with elegant and easy to maintain synthetic iron oxide red usually gives a lustrous finish and gets better with time.

RED

We manufacture premium quality microfined synthetic iron oxide red with bluer tinting which has accurate composition and provides prolonged shelf life known for its purity of minimum proportion of 98%, Red 645 is processed under the guidance of experts, which enhances colour strength. The application of microfined synthetic iron oxide Red 645 with bluer tint very well reacts with the texture of paving tiles. It creates a familiar blend of warmth and positive tones as it has colour flexibility and environmental adaptability.

RED 645

STONE GREY

Synthetic iron oxide Stone Grey is a more naturally appealing version of the colour grey. This grey is a little dark in shade and reflects a feel of minimal and natural surface. It doesn't exhibit dirt or any formations, so it will be a great option to spaces which are vulnerable to the outdoor interactions.

GREY

Synthetic iron oxide Grey from Pigments India Ltd. has been gaining momentum and more significance in the paving industry for the last few years and is highly chosen one by the paving tile manufactures. It provides predictable looks after processing and has high fastness towards intense weather. The neutral and subtle colour impression offered by grey tiles using our Grey oxide is not only impressive but also long lasting.

SILVER GREY

Silver Grey is a lighter version of grey shade. It will be more reflective and aesthetically attractive. It enhances a standard colour feel. Synthetic iron oxide Silver Grey is a perfect choice for outdoor surfaces. The quality of our product will result in its long lasting colour performance and its most modern production techniques ensures the excellent quality and it provides absolute colour purity.

Synthetic iron oxide Yellow compose the paved tiles stain resistance and also avert discolouring or acute fading of tiles. It comes with 86% purity and makes the tiles bloom into extreme vibrancy. The tiles applied with synthetic iron oxide Yellow excel in residential and commercial properties has evolved to be an exotic focal point. A preferred combination of yellow tiles, red tiles and grey tiles provides natural and elegant appearances.

YELLOW

Making a world of tiles with excellent Eco friendly colours that gives exotic looks for the courtyards and pavements, synthetic Green goes well with cement paving tiles.

It is always the prime choice as it distinguishes from others in both quality and colour tones. Like all iron oxides, synthetic Green is also process friendly and non toxic.

GREEN

Synthetic iron oxide Orange enhances the traditional touches to surfaces where it is paved. It provides absolute colour of purity and disperse a terracotta feel. It gets better with time by not losing it's colour finish. Stability and durability are main features of synthetic iron oxide Orange pigment.

ORANGE

The Blue synthetic iron oxide will perfectly add an aesthetically appealing appearance to courtyards and pavements. The colour Blue will be able to provide a soothing experience and will go better with the interior particulars. For these reasons, it's a choice of many.
