# ..... our features

Owing to the vast experience in manufacturing of Synthetic Iron Oxide domain and expert knowledge of our skilled professionals, our company has proudly claimed itself as a renowned provider of High Quality Microfined Synthetic Iron Oxide.

- Synthetic Iron Oxide for Flooring
- Synthetic Iron Oxide for Paints
- Synthetic Iron Oxide for Paving Tiles

# synthetic iron oxide for flooring

Regarded as a synonym of flooring, Synthetic Iron Oxide has been around in this scenario for ages! The most used colors for cement/ mosaic flooring are Red, Yellow, Black and Grey. Synthetic Iron Oxides render supreme results as they are inorganic and hence do not fade due to weather and UV rays. The main benefit of Synthetic Iron Oxide flooring is that it's cost effective in comparison with many other types of flooring, although its procedure is laborious. Highly durable that lasts a lifetime, Synthetic Iron Oxide flooring is a class of its own.

# synthetic iron oxide for paints

An extensively used pigment in all kinds of decorative and industrial paints, Synthetic Iron Oxide's high strength, excellent dispensability and excellent color stability makes them ideal to use in all kinds of paints under extreme weather and atmospheric conditions. And, Pigments India – over the years – has been proudly proclaimed as a renowned provider of high quality Synthetic Iron Oxide, thanks to the vast experience in pigment paint domain combined with a vast knowledgeable & skilled workforce.

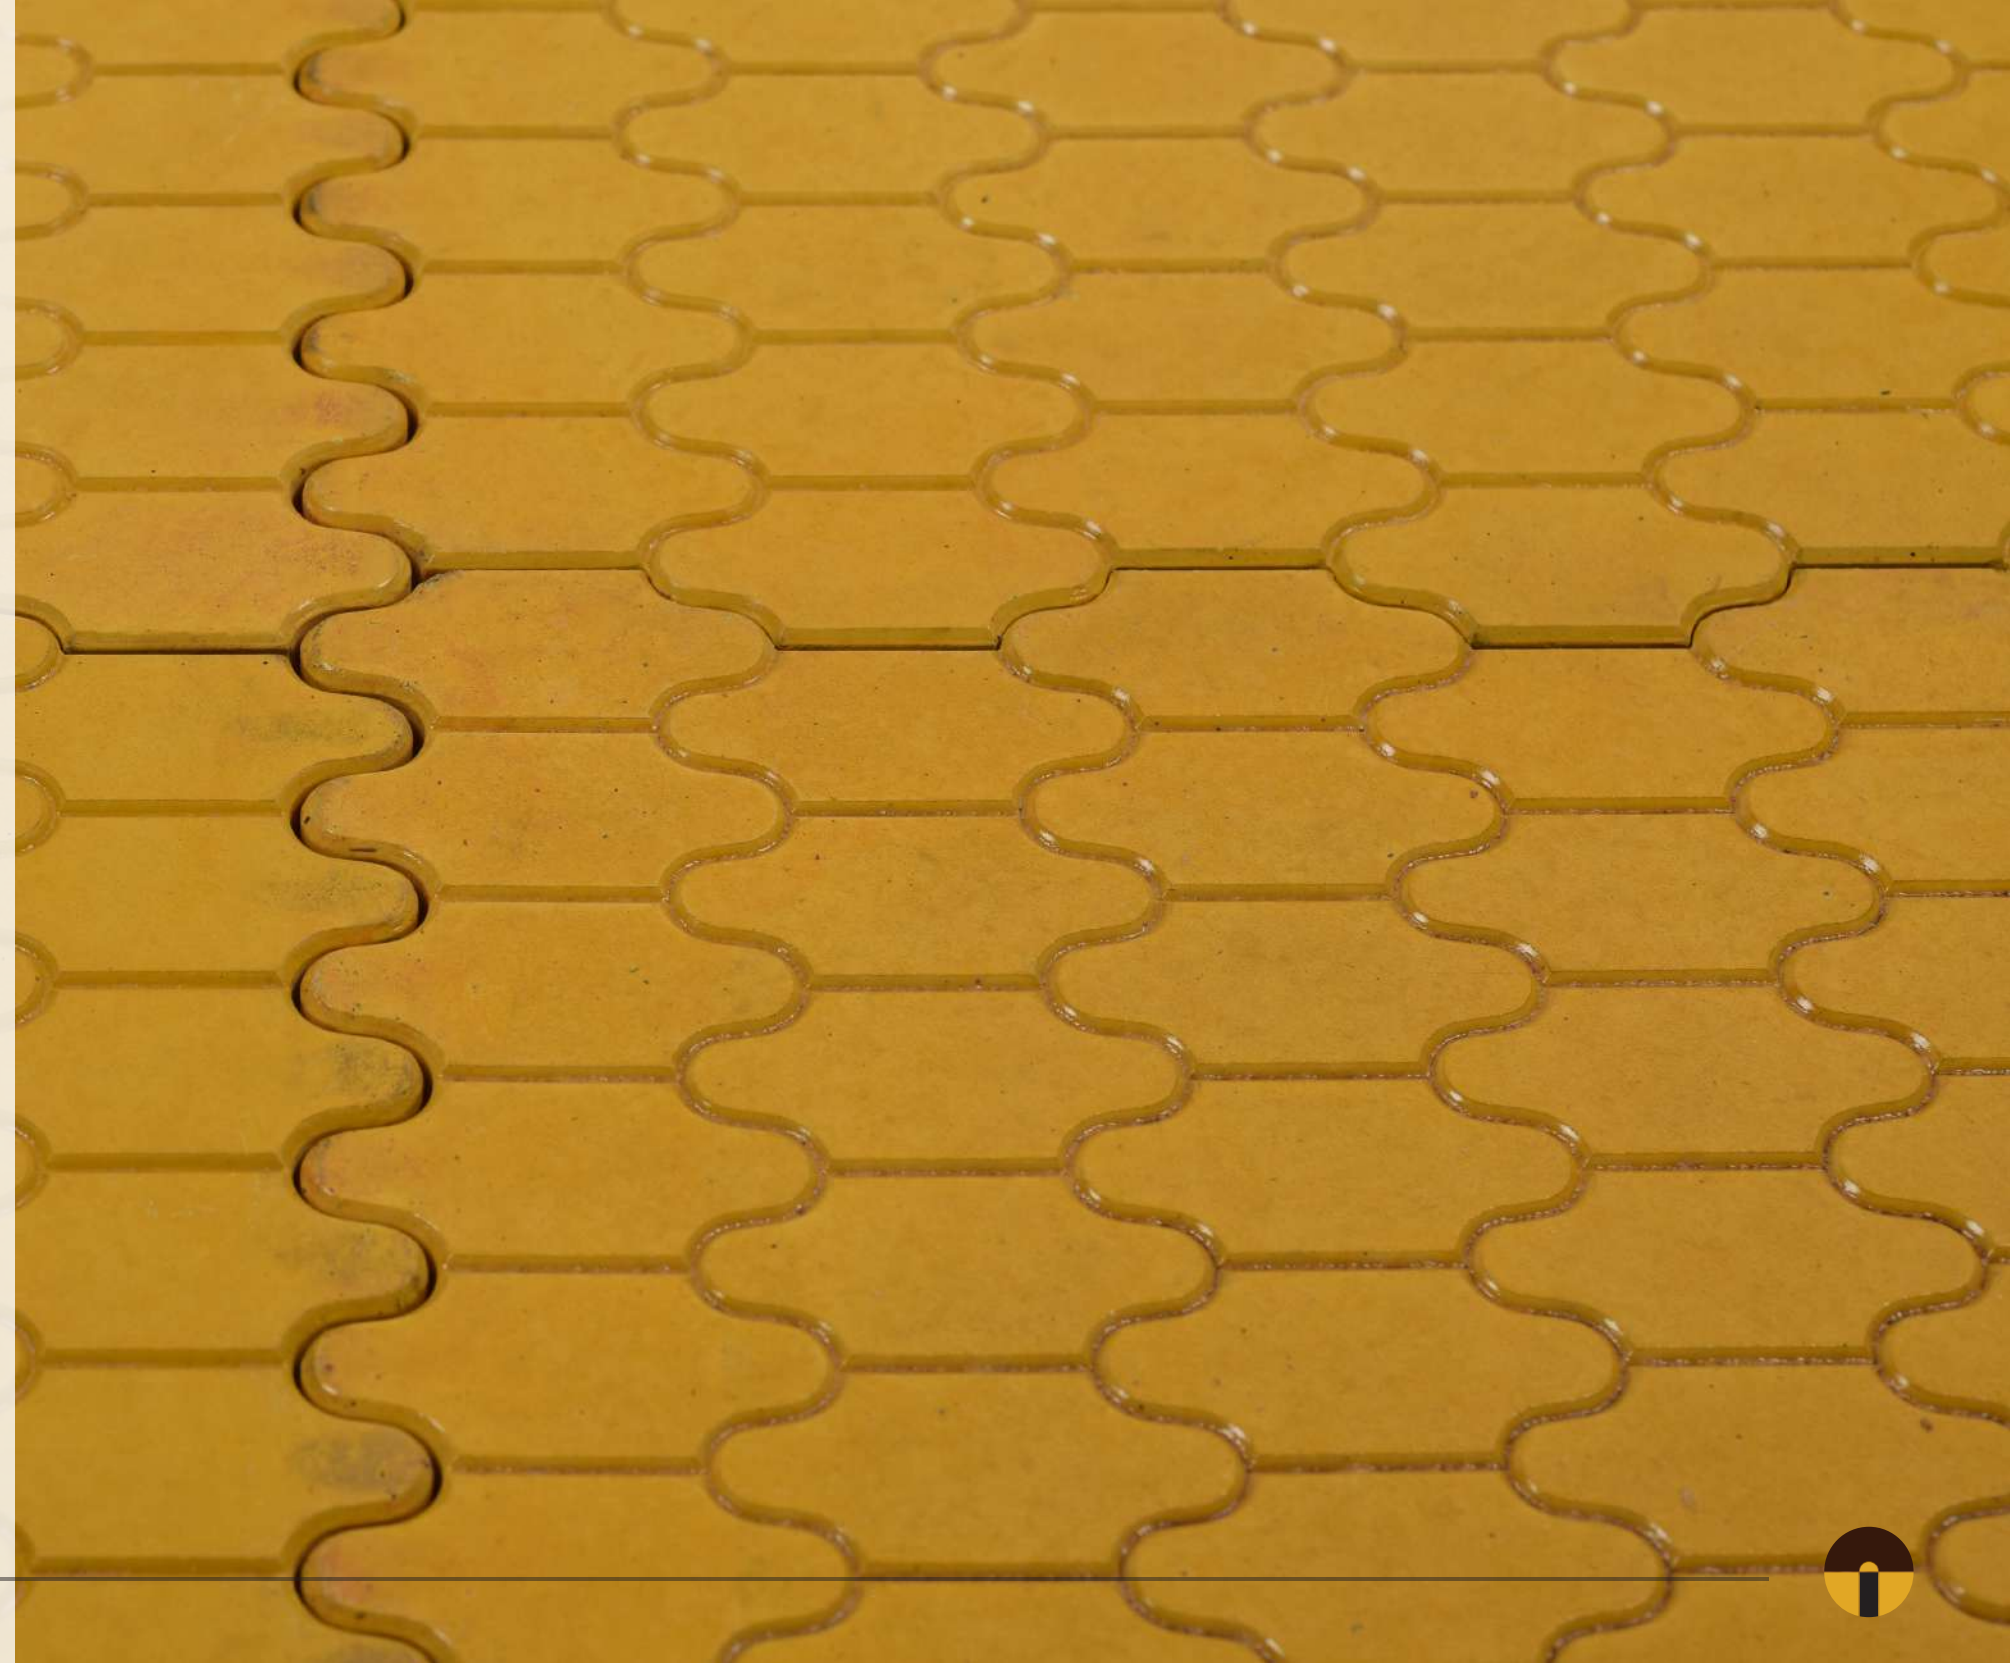

# synthetic iron oxide for paving tiles

Rated as the producer of durable colors, Synthetic Iron Oxides' different shades are added to plasters, concrete blocks, surface textures, etc. to bring out the best of exteriors. The tinctorial strength of the Synthetic Iron Oxide largely depends on the fineness of its particles, and therefore in speaking of 'good quality synthetic iron oxide', one means its fineness. Pigments India offer Synthetic Iron Oxide to reconnect with traditional charm and value of building craftsmanship. Synthetic iron oxide are available in various colors, these can be used as fillers between tiles, textures etc.

# our products

- Laterite Red
- Cherry Red
- Poppy Red
- Ruby Red
- Onyx Black
- Jet Black
- Dark Coffee
- Golden Yellow
- Glacier Grey
- Silver Grey
- Stone Grey

Our assemblage of synthetic iron oxide is identified in the pigment industry by its exceptional weather stability, durability, less toxicity and chemical resistance ability. It is available in different colour shades in accordance with specific requirements and is non aggressive. The exactness in light fastness - the resistance of colours towards fading or darkening because of light and several other factors - is optimal in our synthetic iron oxides which make it more demanding.
